

# White One-Part Pourable Sealer

## PRODUCT INFORMATION

Introducing Firestone White One-Part Pourable Sealer, a quick curing, water tight sealant for smaller penetrations such as pitch pockets, roof intrusions and tubing/wiring penetrations. With its re-sealable pouch, the product may be used for up to 30 days after opening, helping to cut down on waste, which could save you money.

## BENEFITS

- One-Part Formula – No mixing required.
- Re-Sealable Package – Comes in a re-sealable, easy-pour pouch for added convenience.
- Flexible Installation - Moisture cured for use in various climates.
- Pouring Precision - Optional nozzle (PN: W563587081) aids pouring precision for tight spaces.

## PRODUCT DETAILS

- For best performance, evacuate air from inside pouch prior to sealing with cap.
- Shelf life of one year can be expected when stored in original sealed container at temperatures between 60°F and 80°F (15.6 °C and 26.7 °C). Shelf life will be shortened if exposed to elevated temperatures. Do not store in direct sunlight.
- Coverage rate of 122 in<sup>3</sup> (2000 cm<sup>3</sup>) per pouch (fills two W56 TPO 301L Firestone pitchpockets with 1" line protruding pocket).
- When exposed to lower temperatures, restore to room temperature prior to use.
- Keep stored material dry.
